December 21st, 2023

January 18th, 2024

February 15th, 2024

March 21st, 2024

April 18th, 2024

May 16th, 2024

June 20th, 2024

STUDENT-LED INITIATIVE

Students will identify, read, and present primary research articles focusing on sustainability in healthcare, under the guidance of academics and healthcare practitioners with experience in the field.

EXPLORING SUSTAINABILITY IN HEALTHCARE

Priority should be given to research articles focusing on sustainability within healthcare, but articles that focus on the health effects of climate change and environmental/health justice may also be selected.

STAYING UPDATED WITH CURRENT LITERATURE

Students will prioritize research articles from within the last two years to stay apprised of the most current research and thinking.

REVISITING CLASSIC PAPERS

On occasion, seminal research articles, especially those that have had great impact on the field, may also be selected.

CRITICAL THINKING SKILLS

Students will learn how to critically evaluate literature including assessing quality of methods, presence of bias, statistical/ other analyses, strengths and weakness of findings, and to draw independent conclusions from the data presented.

BUILDING NETWORKS

These sessions will serve as a hub for cross-disciplinary communication between clinical specialists, scientists, administrators, environmental engineers, and policy experts.
